

The Medical Freedom Amendment

"**All** people have the Right to secure their Health in the manner they choose. Congress, the President, State Legislatures and Executives, Governmental Agencies or Departments shall make no law, rule, regulation, countermeasure, executive, emergency order, or enter into any treaty or international agreement that impedes the Individual's rights to informed consent nor right to medical choice nor freedom of medical choice. The treaty provision of Article VI of this Constitution shall not apply in any way to this amendment.

Nor shall the President, Congress, State Legislatures and Executives, Governmental Agencies or Departments make any law, rule, regulation, countermeasure, executive, emergency order, or enter into any treaty or international agreement that impedes the Individual's right to medical privacy and freedom without individual and specific judicial warrant supported by Oath and affirmation of necessary cause to protect Society from Harm describing the Individual's condition and danger it presents."

Our government must protect our society and it failed by denying the open discussion of medical therapeutics and analysis of scientific observations. It then incurred the greatest egregious actions against We, the people. It denied informed consent. It colluded through past legislative acts to deny justice and a reckoning of the injustices and abuses.

It did this by authority of the USA Patriot Act of 2001, and the PREP Act of 2005 to function as a military response "countermeasure" with immunity from liability. This legislation brought our Nation to its knees. Courts egregiously adhered to these laws, further denying children the protection of their parents.

The Medical Freedom Amendment

Public Health is not Private Health

- The patient-physician partnership is a one-on-one relationship making clinical care decisions, with the patient reserving ultimate authority to decide.
- Clinical care decisions must not be predetermined by government bureaucrats, statistical analyses, industry influence, insurance carriers, or other outside influences.
- Coercion of any manner, including bribery, incentivization, threats, blackmail, public shaming, scapegoating, exclusion or ostracization from society, and deceptive advertising applied to patients or health care providers, violates patient autonomy.
- Public Health's role is to identify all forms of pollution, reduce and eliminate it. By protecting our environment, we can eliminate the causes of our chronic diseases. We do not need a war on cancer. We need a war on the causes of cancer!

What is Informed Consent?

In the Nuremberg Code of 1947 **Medical Informed Consent** is the very first point. It is a Rule of Law that ensures the Individual has the right to be fully informed and comprehend the risks, benefits, and alternatives of a medical intervention before making a decision.

Informed Consent is the most important issue of the 21st century. It is the cornerstone of medical freedom, individual health and medical choice. As a Rule of Law it cannot be pre-empted nor is it conditional. Therefore, there are no actions restraining its actions.

What is Medical Choice?

It emphasizes an Individual's right to make decisions about their healthcare, including treatment options, providers, and interventions, or nothing at all.

There is an overlap between medical choice and informed consent, emphasizing that informed decision-making is a key aspect of exercising medical choice.

Medical Freedom is the individual's absolute and inalienable right to autonomy over one's body regarding all medical treatment. The amendment presents a wall of opposition against abusive laws, rules, regulations, countermeasures, executive and emergency orders, international treaties and Agreements that deny freedom of choice, informed consent, medical privacy and medical freedom for our most intimate decisions.

Medical Freedom Amendment
"All people have the Right to secure their Health in the manner they choose."
