

Dear Representative,

Now is the time to introduce and pass the Medical Freedom Amendment. There is an urgency to adopt the Amendment never more clearly presented before us than today.

**Proposed 28th Amendment to
the United States Constitution**
The Medical Freedom Amendment

Statement of the Amendment

"All people have the Right to secure their Health in the manner they choose. Congress, the President, State Legislatures and Executives, Governmental Agencies or Departments shall make no law or executive order that impedes the Individual's rights to informed consent nor right to medical choice nor freedom of medical choice. Nor shall the President, Congress, State Legislatures and Executives, Governmental Agencies or Departments make any law or executive order that impedes the Individual's right to medical privacy and freedom without individual and specific judicial warrant supported by Oath and affirmation of necessary cause to protect Society from Harm describing the Individual's condition and danger it presents."

Why should you support this Amendment?

Representatives' lives are hectic and in constant demand. Have you recognized what has happened to medical freedom and the unrelenting attacks and abuses it has received? Are you aware of the unanswered issues and problems forced medical

treatment has unleashed on your constituents? Have your constituents informed you of unnecessary deaths and harm? If you immediately consider this issue irrelevant and the questionnaire not worth responding, then you have a major gap of critical information and knowledge that has routinely been censored and you are a victim of that censorship. However, the wheels of justice move forward and thanks to the court system and Freedom of Information Act the grave injustice done to all of us is emerging. If you support this Medical Freedom Amendment then we will support you. If you need more information, then we are here to provide that.

We are witnessing the medical censorship, medical discrimination and medical abuse of such great magnitude we have never experienced before. We witness little accountability or responsibility on the part of government to respond appropriately. We are aware, however, of fourteen States that are taking action in the direction of this Amendment. This is a national Amendment and reflects our American values of individual rights and freedoms. We need your action to reveal the abusers, oppressors, and censors by endorsing the Medical Freedom Amendment and bringing transparency and investigation to this intolerable state of affairs.

We call upon your judgement and integrity to endorse this Amendment and to end this cycle now. It is long overdue from the beginning of this Republic. The United States Constitution must now protect Individual rights of informed consent, freedom of medical choice, medical freedom, and medical privacy by the enactment of the [Medical Freedom Amendment](#).
